

# WELLS CARGO

SN#: TX050801

## **Emergency Response Trailers**

Providing transportation and storage of specialized equipment for a variety of emergency services.

*With a Wells Cargo Behind . . . You Never Look Back!™*

## HOOK UP & GO!

With a Wells Cargo emergency response trailer, all your tools, equipment, and gear are ready to roll in a moment's notice. Just hook-up and go. You'll find thousands of fully customized Wells Cargo emergency response trailers are already hard at work in the field today.

We operate under the principle that emergency response equipment is too expensive (and too vital to your mission) for our customers to have to settle for anything but the proven best. With that idea in mind, we have brought to the market a series of customized trailers specifically designed to accommodate the challenging demands of the First Responder industry.

Our reputation for long lasting durability stems from a heavy-duty steel frame that doesn't need pampering. No shortcuts. No cutting corners. Just the strongest frame construction available. We use only the best materials and combine them with over 55 years of manufacturing experience. Every trailer is engineered to deliver hassle-free performance — day in and day out. It's no surprise that we can confidently tell you to plan on at least 15 years of dependable service.
